

Honing Solution

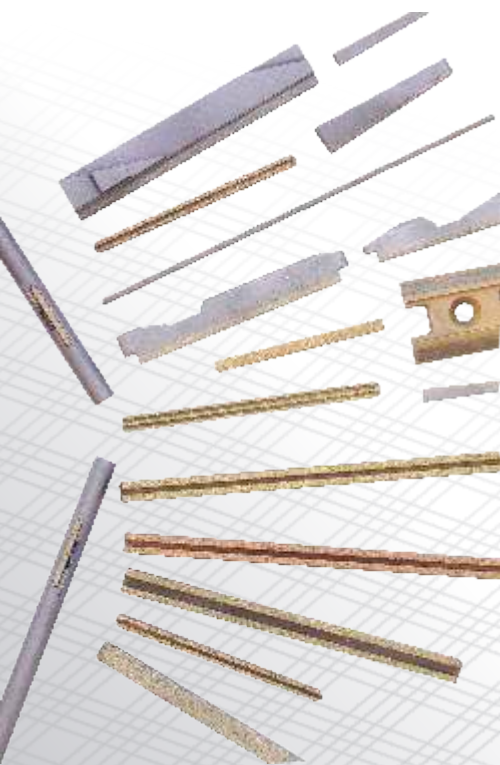

Super Abrasives and Tools

Our range of super abrasives and honing tools offers to our customers a complete, competitive priced solution and technology developed to work in a wide range of materials including cast iron, tempered steel, forged steel, bronze, chrome, ceramics, among many others, covering all segments of the industry. We have a team of highly skilled and experienced engineers, technicians and designers, with one agile and flexible production, which makes our deadlines far below from our competitors.

We produce super abrasive stones with the highest technology in metal alloys, diamonds and CBN (Cubic Boron Nitride), always using raw materials from the best suppliers in the world. With rigorously tracked and controlled manufacturing processes, the sintering of our abrasive stones are done in CNC machines with controlled atmosphere, ensuring that our products are consistent over time and are always delivered with the best quality for customers.

We offer our customers a line of custom-made and interchangeable tools for all types and brands of honing machines available on the market. With high precision in our production process, our expansive and single pass type (precidor) tools, with pneumatic measuring and automatic compensation, make the products with the finishing, dimensional and technical specifications within the customer's requirements.

We are a Brazilian company, founded in 1992, and we operate in the market offering innovative solutions in the field of honing machines, honing tools and diamond and Borazon honing stones. We have ISO 9001 certification and have exported our technology to many countries since 2003.
