

Honing Solution

Honing of Brakes: Drums, Wheel Cylinder, Master Cylinder and Clutch Cylinder

We have the solution for all the honing products related to automotive brakes in the market. For brake drums we produce tools for many diameters and up to 20 diamond stones, which ensure that the main characteristics required by customers, such as crosses of risks and dimensional of the parts are perfectly achieved. We also work with a full range of expansion honing tools of clutch cylinders, wheel cylinders and master cylinders, which ensure the dimensional and roughness required in the final product.

Honing of Hydraulic Steering

We have a range of special expansive honing tools for half blind and through holes of hydraulic steering components, for diameters ranging from 10 to 25 mm, ensuring the roughness and dimensional that is required in the customer's final product.

We are a Brazilian company, founded in 1992, and we operate in the market offering innovative solutions in the field of honing machines, honing tools and diamond and Borazon honing stones. We have ISO 9001 certification and have exported our technology to many countries since 2003.

Honing of Turbochargers

Brunitec single-pass tools meet all requirements for turbocharger honing for all car and truck engines on the market in a wide range of diameters. They are able to achieve the required dimensional, offering great durability and quickness in the honing process.

Honing of Components of Diesel Injection Pumps

We have the tool and diamond solution to hone the entire line of components and diesel injection pumps. Our special expansive tools have been developed for hard steels and diameters ranging from 5 to 40 mm, providing a high degree of material removal and reaching the specified finish.
